What is needed to make it possible to use your ideal travel mode?

no answer
adequate VTA budget/frequency of service
no answer
more motivation
no answer

safe bike lanes, public transportation that does not take an hour and 1/2 to get some place that takes 10 min. to drive to bike lanes

no answer
increased transit frequency. Less waiting for busses and trains. Cheaper/less cost to riders (more subsidy)

no answer
no answer
more stores distributed around; self employed so travel around the area by myself

no answer
safer bike paths/routes, walkable centers of services, nicer and more frequent public transport

no answer
better infrastructure, more educated motorists
no answer

bigger sense of community, safety and good looking places to walk

no answer
safer bike lanes; more frequent buses and trains
more frequent transit

no answer
connectivity, multiple choices in destinations

no answer
high-density housing and bus system (word unknown)
neighborhoods

a carpool system at work, bike paths
more bike and pedestrian friendly infrastructure. Mixed use, more dense development

more amenities closer to neighborhoods
make more transit available and affordable (cheap). Make roads bicycle and pedestrian friendly

more frequent mass transit, possibly smaller vehicles (electric)
destinations near home. Bike trails, safe bike lanes

bike

more bike and safe lanes. Expand public transportation facilities and educate public about (word unknown)
A new LUTE and zoning for "smart" land use. Make Mary Avenue a bike boulevard and close it to cars at railroad tracks; provide a bike/pedestrian crossing at at trades and over under Evelyn instead

bike, walk

car, bike, walk

grocery store I can safely walk to and other services close by
